Dear

I am writing to express my interest in joining the team as a Full Stack Web Developer. I am an Electronic Engineer with a solid track record in software development and a specialization in modern web technologies. I am currently pursuing a Full Stack Software Developer certification at 4Geeks Academy and have developed multiple projects where I apply modern architectural practices, secure authentication, and efficient data management.

In my current role at Grandtek, I lead the full application development cycle, from requirements gathering to implementation. I have worked with technologies such as React, Angular, Node.js, Flask, MySQL, Sequelize, PHP, and Laravel, integrating scalable and secure solutions. I also have previous customer service experience in English, which allows me to collaborate fluently in global environments.

My most notable projects include the development of an online solar panel store, a digital library, and a virtual parking system. In all of them, I have implemented JWT authentication, custom administrative panels, and robust backends, which has allowed me to strengthen my skills in systems design and business logic.

I identify with the values of innovation, collaboration, and continuous improvement that 4Latam promotes. I am convinced that my technical and human skills can contribute to the growth of your team and the success of your clients. I look forward to an interview opportunity to discuss how I can contribute to your projects in more depth.

Thank you for your time and consideration.

Jullian David Ortega Solarte
